WORKMEN'S COMPENSATION BOARD.

"WORKMEN'S COMPENSATION ACT."

LOGGING ACCIDENT PREVENTION REGULATIONS.

PURSUANT to the "Workmen's Compensation Act," being chapter 278 of the "Revised Statutes of British Columbia, 1924," the Workmen's Compensation Board has adopted the following regulations for the prevention of accidents and industrial diseases in logging:—

RIGGING.

1. *Tail-sheave Guards*.—When logs are hauled on a skid-road, the tail-sheaves shall be so guarded that no one may be caught between the sheave and the on-running rope.

2. *Slings*.—All slings to which blocks are attached shall be of strength equal to one and one-half ($1\frac{1}{2}$) times that of the hauling-lines.

3. No workman shall work within the bight of any line.

4. Pins and fastenings of high-lead sheaves shall be of a strength commensurate with the maximum load to which they may be subjected. All pins shall be securely fastened with a forelock. This equipment shall be given careful inspection by a competent authority before setting up.

5. When conditions of unloading require that an unloading-line be attached to logs or cars or passed under the logs, the equipment shall be so arranged that it will be unnecessary to do any of the work of attaching the unloading-line on the unloading side after the chains or chocks are released.

6. Head-spars, tail-trees, and gin-poles shall be carefully selected, and shall have sufficient guy-wires so that the breaking-strength of these structures shall be double the breaking-strength of cable.

7. In sky-line operations, sky-line shall run through tree-jack to stump and not be fastened to tail-spar.

8. All spar-trees shall be topped, with limbs trimmed close.

9. Trees, snags, and saplings within reach of landing-machines or guy-lines shall be felled.

10. When a workman is required to work aloft, he shall use standard equipment, including a safety-belt, a wire-line or wire-cord Manila rope, and climbing-spurs, all of which shall be maintained in good order. A complete spare set of standard climbing equipment shall be provided and kept ready for immediate use in case of emergency.

11. All stumps used for anchorage shall be selected by the Superintendent Woods Foreman, Hook-tender, or Head Rigger, and be properly notched and spiked. Standing timber shall not be used for spar-tree anchorages. These anchorages shall be inspected daily by a competent employee.

12. There shall be a safety-strap on all high-lead blocks fastened to a guy-line. Guy-lines farthest from the proximity of the workmen shall be used for this purpose. Loading-blocks shall also be fitted with safety-straps.

13. When yarding, lead blocks shall not be fastened to standing timber unless necessary.

14. Ends of cables shall be securely fastened to drums. There shall be not less than two full turns of cable on the drum. All hooks, rings, and shackles shall be securely fastened to cables, and all shackles shall have a forelock.

15. Working-load on cable shall not exceed the working-strength guaranteed by manufacturers of cable.

16. When cables deteriorate through rust, wear, broken wires, undue strain, or other conditions to the extent that they are unsafe for the purpose for which they are intended, they shall be discarded.

17. All fastenings shall be annealed frequently enough to avoid crystallization.

18. Main lines, high-lead and loading lines, blocks and cables shall be inspected and approved by foreman or riggerman before being hung, and shall be kept well oiled. Blocks shall not be oiled while in motion.

19. Swamp hooks or tongs shall be attached to crotch-line with cleavices or approved safety device.

20. When lifting or hauling big timber, chokers shall be used.

21. Molly-hogans shall not be used for couplings except when changing lines.

22. Riggers shall use pass-line when going up tree to work. Pass-lines shall be fitted with a link or ring as a guard to prevent riggers from being drawn into blocks.

23. When the high rigger is in the tree, one man shall be detailed to give signals and he shall not be otherwise occupied during that time. This signalman shall be far enough away from the tree to be out of danger from falling objects.

FALLING AND BUCKING.

1. Workmen not directly connected with falling and bucking shall not work where they are in danger of being injured by these operations.

2. The Head Faller shall be held responsible for the safety of the second faller and the buckers of his gang.

3. When cutting up a tree lying on an incline, the bucker shall work on the upper side.

4. *Fallers*.—Before starting to fell a tree, adjacent brush shall be cleared away so that there is plenty of room to swing an axe and to permit a quick get-away.

5. When a tree starts to fall, fallers shall quickly get away to a safe distance.

6. Fallers shall see that their spring-boards are in a safe condition at all times.

7. Fallers shall give timely warning to buckers and other persons in the vicinity where tree is being felled, taking notice that such persons are not only out of reach of tree, but also out of danger of possible side-winders, snags, or other trees which may be knocked over by tree being felled.

8. Fallers shall work in such positions that falling trees or side-winders will not reach another set of fallers.

9. Fallers or buckers shall not work on hill-sides immediately below each other where there is danger of skidding or rolling trees.

10. Trees shall not be felled if falling tree can strike any running line of any unit in operation or any standing line, such as skyline, tail-hold, guy-lines, etc.

11. In general, the Bull-bucker shall be responsible for safe working conditions for fallers and buckers.

YARDING AND LOADING.

1. *Log-landings*.—Where practicable in laying out log-landings or rollways, the loading-donkey shall be so placed that the donkey engineer has a full and unobscured view of the operations.

2. Loading-donkeys shall be so set as to be entirely clear of cars being loaded.

3. When logs are to be hauled on established skid or truck road, all dead trees, dangerous small trees, or trees where limbs are liable to fall, and all snags and sweepers shall be felled to a safe distance before operating load.

4. All limbs shall be trimmed close before log is loaded.

5. No workman shall ride on hook or log while loading, or while log is being hauled, or while log is travelling down a grade chute or in a flume.

6. Signalman shall not give signal ahead or come back until every one is in the clear. Signalman shall be in full view of the rigging crew and shall not give signals without orders, except to stop lines when danger is seen.

7. Before giving "go ahead" signal, all riggingmen shall be behind turn at a safe distance therefrom.

8. Yarding-machines shall not be operated under guy-lines if it can be avoided.

CAT LOGGING.

1. All tractors used for yarding and hauling shall be equipped with a suitable steel guard to protect the driver from falling saplings, chunks, or limbs.

2. Cat drivers shall have unobstructed view of logs and rigging crew when signal to go ahead is given. Drivers must see that no one is in range of swinging logs when breaking turns around stump. Cats shall be equipped with rear-vision mirrors.

3. Line-guards shall be kept on the arch at all times.

4. Cranking of cats shall be done only by experienced persons.

5. Riding the turn, the arch, or behind seat of cat is forbidden.

6. Logs shall not be swung over cat with loading-machine.

TRUCK LOGGING.

1. All trucks, tractors, and trailers shall be kept in good order and brakes shall be inspected by a competent mechanic at least once a week. A written record of such inspections shall be kept by employer and signed by the Inspector.

2. For the protection of the driver, trucks used for hauling logs shall be equipped with a substantial bulkhead or bumper, securely fastened to frame of the truck.

3. Logs carried on trucks shall be securely fastened to prevent slipping.

4. All timber truck-logging roads shall be of substantial construction, built with side-guard logs, and kept in good repair. Decking over 4 inches thick shall be fastened with headed drift-bolts, staggered.

TRANSPORTATION OF CREW.

1. When crew is transported by speeder, men shall not sit on floor of vehicle with their legs hanging over the side, unless foot-board is provided.

2. Men shall not get off or on moving crew-cars. No stops shall be made on a trestle for unloading or picking up crew.

3. All cars used for carrying loggers shall be equipped with saw and axe racks, and all saws and axes shall be in racks while being transported.

4. All trailers shall be equipped with brakes.

EQUIPMENT.

1. Leaky throttles shall be repaired immediately.

2. *Handles.*—Saw-handles shall be equipped with approved guards.

3. There shall be a guard at side of main rod on all hoisting and logging engines.

4. All gears, frictions, sheaves, set-screws, keys, ends of shafts, and spoke hazards, shall be guarded as per General Rules.

5. Wedges and similar tools with burrs or mushroomed heads shall not be used. All handles shall be of sound material and securely fastened. Such tools shall be properly tempered.

6. All gas-donkeys shall have an approved whistle.

GENERAL.

1. Standing timber on camp-sites and mill-sites shall be felled before buildings are erected, so that there shall be no possibility of trees falling on buildings.

2. There shall be sufficient lights to illuminate walks, steps, and entrances to camp buildings.

3. Spikes, drift-bolts, and nails shall not be driven into any sawlog.

4. All men working in the woods shall wear calked shoes, which shall be kept in good condition at all times.

5. Power-boats used as camp tenders or tugs shall be provided with life-belts (one for each member of the crew) and a life-buoy. Such boats shall have substantial hand-railings around decks.

6. All camps on floats shall have a proper landing-float, with a walk at least 4 feet wide to shore, equipped with a hand-rail.

7. Warning-signs which conform to British Columbia Railway Rules shall be provided and set eighty (80) rods from each end of all log-landings or rollways on main lines.

8. When logs are being hauled across a track, every train shall be brought to a full stop two hundred feet (200 ft.) from the point of crossing, unless given signals by flagman to proceed. Warning-signals to conform to British Columbia Railway Rules shall be provided and set eighty (80) rods from each side of skidway.

9. No tree shall be felled toward and within range of travelled road or railroad-track in use, unless a flagman is placed on such road or track to warn all approaching persons or stop vehicles such as automobiles, speeders, locomotives, etc., until tree is down and proper precautions taken to protect traffic.

10. Unloading-platforms shall be kept clean and in good repair.
